

Safety Data Sheet (SDS)

Date prepared 29-Apr-2016
Date revised 1-Apr-2022

Applicable products CHUKOH FLO™ Adhesive tape
ASF-110FR, ASF-110, ASF-110FN, ASF-119T, ASF-130T, ASM-110, AFA-113A

1. Product and company identification

Product name See the applicable products above.
Product code -
Company name CHUKOH CHEMICAL INDUSTRIES, LTD.
Address ATT New Tower 10F, 2-11-7, Akasaka, Minato-ku, Tokyo
Telephone 03-6230-4414/81-3-6230-4417
Fax 03-6230-4413/81-3-6230-4446
Recommended use For industrial use
Restrictions on use For industrial use
Information on domestic manufacturers, etc. See above

2. Hazards identification

GHS Classification Not applicable
GHS label elements Not applicable
Pictures or symbols No information available
Warning statements No information available
Hazard information No information available
Cautionary statements No information available
Other hazards not related to or addressed by the GHS classification No information available
Summary of important indications and possible emergencies No information available
Other Not hazardous under normal handling. Heating fluorocarbon resin produces pyrolysis products (fumes), which may cause eye, nose, and lung irritation if inhaled.

3. Composition/information on ingredients

Substance/Mixture Mixture

| Chemical name or generic name | Concentration or concentration ranges | Chemical formula | Reference No. in gazetted list in Japan | | CAS No. |
|-------------------------------------|---------------------------------------|------------------|---|----------------------------------|---------|
| | | | Chemical Substances Control Law | Industrial Safety and Health Act | |
| Fluoro resin | 42-98% | - | - | - | - |
| Adhesive material of silicone group | 2.0-58% | - | - | - | - |

Ingredients contributing to GHS classification No information available

4. First-aid measures

| | |
|--|--|
| Inhalation | If fumes from heating or burning are inhaled, remove to fresh air and keep at rest in a position comfortable for breathing. Seek medical advice/attention if you feel unwell. |
| Skin contact | Wash with plenty of soap and water. If molten polymer contacts skin, cool rapidly with cold water. Do not attempt to peel polymer from skin. Seek medical advice/attention if irritation occurs. |
| Eye contact | Flush eyes cautiously with water for several minutes. Seek medical advice/attention if irritation persists. |
| Ingestion | Rinse mouth. Seek medical advice/attention if you feel unwell. |
| The most important manifestations of acute and delayed symptoms | No information available |
| Precautions necessary for the protection of persons who provide first-aid measures | No information available |
| Special precautions for physicians | No information available |

5. Fire-fighting measures

| | |
|--|---|
| Appropriate fire extinguishing media | Small fires: Dry chemical, carbon dioxide, water spray, and general foam. Large fires: Water spray, water mist, and general foam. |
| Fire extinguishing media that should not be used in case of fire | No information available |
| Specific fire hazards | This product hardly flammable. Fire may produce irritating, corrosive, and/or toxic gas. |
| Specific fire extinguishing methods | Move product from fire area if you can do so without risk. |
| Special protective equipment and precautions for firefighters | Wear self-contained breathing apparatus (SCBA). Firefighters should wear protection clothing and self-contained breathing apparatus (SCBA). |
| Cautions | When fluorocarbon resin is exposed to high temperatures, it produces harmful particulates, fumes, and gases. In case of fire, evacuate upwind as far as possible to avoid inhalation. |

6. Accidental release measures

| | |
|---|---|
| Personal precautions, protective equipment and emergency procedures | Wear suitable protective equipment (see Section 8, Exposure controls/personal protection) to prevent inhalation and exposure of eyes or skin. |
| Environmental precautions | Avoid discharge to rivers and environmental effects. |
| Methods and materials for containment and cleaning up | Break into small pieces. Collect if scatter. Dispose in accordance with Section 13. |
| Measures to prevent secondary accidents | No information available |

7. Handling and storage

| | |
|--------------------|---|
| Handling | |
| Technical measures | Install equipment in Section 8, Exposure controls/personal protection. Wear protective equipment. |

| | |
|-------------------------------|--|
| Precautions for safe handling | Do not carry cigarettes, cigars or tobaccos and do not smoke in the workplace as decomposition gas may be inhaled by smoking if the substance contacts them. Do not eat, drink or smoke when using the product. Prohibit the use of heat, sparks, and fire in the surrounding area. Watch out for fire. Do not touch, inhale or swallow this product. Use exhaust ventilation to maintain airborne levels below exposure limits. |
|-------------------------------|--|

| | |
|--|--|
| Avoidance of contact Hygiene measures | See Section 10, Stability and reactivity. Wash hands thoroughly after handling. |
|--|--|

Storage

| | |
|---|--|
| Conditions for safe storage | Stable at normal storage conditions. Storage at or below 25°C and 60% RH is preferred. |
| Safe containers and packaging materials | No restriction for packaging materials. Use containers which will not be broken. |

8. Exposure controls/personal protection

| | |
|--|---|
| Control concentration Allowable concentration Engineering measures | Not set Use explosion-proof electrical/ventilating/lighting/equipment. Good general ventilation should be sufficient to control airborne levels. If dust or fume is generated at high temperature install ventilation equipment to keep concentration of air pollutant below administrative level/allowable concentration limit. |
|--|---|

Protective equipment

| | |
|--------------------------|--|
| Respiratory protection | Wear respiratory protection. Wear air-supplied respirators or gas mask for organic gas. |
| Hand protection | Wear eye protection. |
| Eye protection | Wear personal protective equipment including protective clothing and protective mask if necessary. |
| Skin and body protection | Wear personal protective equipment including protective clothing and protective mask if necessary. |

9. Physical and chemical properties

Appearance

| | |
|----------------|---|
| Physical state | Solid |
| Color | White (ASF-110 FR, ASF-110, ASF-119T, ASF-130T , ASM-110) Transparent (AFA-113A) |

| | |
|------|----------|
| Odor | Odorless |
|------|----------|

| | |
|------------------------------|---------------|
| Melting point/freezing point | Not available |
|------------------------------|---------------|

| | |
|---|---------------|
| Boiling point, initial boiling point, and boiling range | Not available |
|---|---------------|

| | |
|--------------|------------------|
| Flammability | Flame Retardancy |
|--------------|------------------|

| | | |
|---|----------------|--------------------------------|
| Lower explosion limit and upper explosion limit/flammable limit | Lower Upper | Not available Not available |
|---|----------------|--------------------------------|

| | |
|-------------|---------------|
| Flash point | Not available |
|-------------|---------------|

| | |
|-----------------------------------|--|
| Autoignition temperature | Not available |
| Decomposition temperature | Not available |
| pH | Not available |
| Viscosity | Not available |
| Solubility | Insoluble in water. Swells in some solvents. |
| Partition coefficient (n-octanol) | Not available |

| | |
|---------------------------------|---------------|
| Vapor pressure | Not available |
| Density and/or relative density | Not available |
| Relative gas density | Not available |
| Particle characteristics | Not available |
| Other data | Not available |

10. Stability and reactivity

| | |
|------------|--|
| Reactivity | Hazardous reactions will not occur under normal conditions. Begins to decompose, very slowly, at temperatures above 260°C. Thermal decomposition is more rapid at temperatures above 400°C. |
|------------|--|

| | |
|--------------------|--|
| Chemical stability | Stable under normal storage and handling conditions. May react with metal powders such as aluminum and magnesium or with fluorine compounds such as fluorine and chlorine trifluoride, and cause fire and explosion. |
|--------------------|--|

| | |
|------------------------------------|---|
| Possibility of hazardous reactions | Hazardous reaction or polymerization generating excessive pressure/heat will not occur. |
|------------------------------------|---|

| | |
|---------------------|--|
| Conditions to avoid | Heat. Contact with incompatible materials. |
|---------------------|--|

| | |
|------------------------|---|
| Incompatible materials | Metal powders such as aluminum and magnesium or fluorine compounds such as fluorine and chlorine trifluoride. |
|------------------------|---|

| | |
|----------------------------------|---|
| Hazardous decomposition products | Thermal decomposition of this product may evolve the following decomposition products at the following temperatures: Carbonyl fluoride and hydrogen fluoride (above 400°C). Tetrafluoroethylene (above 430°C). Hexafluoropropylene (above 440°C). Perfluoroisobutylene (above 475°C). |
|----------------------------------|---|

11. Toxicological information

| | | |
|--|--------------------|---------------|
| Acute toxicity | Oral | Not available |
| | Dermal | Not available |
| | Inhalation (vapor) | Not available |
| | Inhalation (dust) | Not available |
| Skin corrosion/irritation | | Not available |
| Serious eye damage/eye irritation | | Not available |
| Respiratory or skin sensitization | | Not available |
| Germ cell mutagenicity | | Not available |
| Carcinogenicity | | Not available |
| Reproductive toxicity | | Not available |
| Specific target organ toxicity (single exposure) | | Not available |

| | |
|--|--|
| Specific target organ toxicity (repeated exposure) | Not available |
| Swallowing hazard | Not available |
| Others | Thermal decomposition of fluoropolymers may generate polymer fumes, hydrogen fluoride, carbonyl fluoride, and perfluoroisobutylene. The toxicity information is as follows. |
| Effects on humans | Inhalation of fumes from burning may produce polymer fume fever, a temporary flu-like condition with fever, chills and cough. This may last for a whole day and night. Skin absorption will not occur. There are no reports of sensitization. |
| Effects of hydrogen fluoride | Inhalation of low concentrations of hydrogen fluoride can initially include symptoms of choking, coughing, and severe eye, nose, and throat irritation, fever, chills for one to two days, followed by difficulty in breathing, cyanosis, and pulmonary edema. Overexposure to hydrogen fluoride can injure the liver and kidneys. |
| Effects of carbonyl fluoride | Skin: Irritation with discomfort or rash Eye: Corrosion with corneal or conjunctival ulceration Upper respiratory passage: Irritation Lung: Temporary irritation effects with cough, discomfort, difficulty in breathing, or shortness of breath (Individuals with pre-existing diseases of the lungs may have increased susceptibility to the toxicity after excessive exposures to thermal decomposition products.) |
| Effects of perfluoroisobutylene | Even trace amounts are extremely toxic. |
| 12. Ecological information | |
| Ecotoxicity | Not available Handle with care as leakage or disposal may affect the environment. In particular, ensure that the product does not flow directly into the ground, rivers or drains. |
| Persistence and degradability | Not available |
| ecological accumulative property | Not available |
| Mobility in soil | Not available |
| Hazardous to the ozone layer | Does not contain any substances that deplete the ozone layer listed in Annexes to the Montreal Protocol. |
| 13. Disposal considerations | |
| Waste from residues | Dispose in accordance with applicable laws and regulations and standards of local governments. Entrust the disposal to a licensed waste disposal contractor or a local public body who conducts the disposal. When entrusting the disposal to a disposal contractor, notify the danger and toxicity thoroughly to the contractor. |
| Contaminated container and packaging | Dispose in accordance with applicable laws and regulations and standards of local governments. |
| 14. Transport information | |
| UN number | Not dangerous goods |
| Item (UN transport name) | Not dangerous goods |

| | |
|---|--|
| UN Classification | Not dangerous goods |
| Container grade | Not dangerous goods |
| marine pollutant | Not dangerous goods |
| Liquid substances transported in bulk according to MARPOL 73/78 Annex II and IBC Code | Not dangerous goods |
| Special safety measures for transportation or means of transportation | Confirm that there is no damage, corrosion, or leakage of the containers before transportation. Avoid direct sunlight at transportation. Load containers not to cause damage, corrosion or leakage and thoroughly prevent load collapse. Do not stack heavy objects. |
| Regulatory information on domestic regulations, if any | Not applicable |

15. Regulatory information

Applicable laws and regulations and information on requirements imposed by such laws and regulations

| | |
|--|----------------|
| Pollutant Release and Transfer Register (PRTR) | Not applicable |
| Industrial Safety and Health Law | Not applicable |
| Poisonous and Deleterious Substances Control Act | Not applicable |
| Other applicable laws and regulations and information on requirements imposed by | Not applicable |

16. Other information

Hazard statements herein are made based on the assumption of industrial use and general handling. Handle with care at the actual use by referring to the hazard statements herein.

| | |
|---------------------|---|
| Restrictions on use | This product is not intended for medical use. Do not use this product for implant or in a way that will contact with the body fluid or tissue. Consult with us in advance if it is expected to use the product in medical field. |
| References | SDS made by raw material manufacturers. |

The information herein may be revised if any new findings are obtained.
 Values of concentration and physical and chemical properties are not guaranteed values.
 Hazards identification was prepared based on the documents, information and data available at the time of preparation, but it does not mean that all documents, information and data are covered.
